Acknowledgement to Reviewers 2025

The strength and credibility of a scientific journal rest upon the rigor, fairness, and dedication of its peer-review process. At Annals of Geophysics, peer review is not merely a procedural step; it is the foundation upon which the quality and integrity of our published research are built.

On behalf of the Editorial Board of Annals of Geophysics, I wish to express our deepest gratitude to all the reviewers who, throughout the year, have generously devoted their time, expertise, and thoughtful judgment to the evaluation of submitted manuscripts. Their careful assessments, constructive recommendations, and commitment to high scientific standards ensure that the research we publish is original, methodologically sound, and relevant to the broader geoscientific community.

As a Diamond Open Access journal, Annals of Geophysics is committed to making high-quality scientific research freely accessible to the global community without financial barriers for authors or readers. In this model, the contribution of reviewers becomes even more essential, as the strength and sustainability of the journal rely fundamentally on academic service, shared responsibility, and scholarly integrity.

Thanks in no small part to their dedication, Annals of Geophysics has continued to strengthen its scientific standing. In 2025, the journal recorded an improvement in its Impact Factor, a result that reflects both the quality of the contributions we receive and the rigor of the evaluation process that shapes them. This achievement is the outcome of a collective effort involving authors, reviewers, and the Editorial Board working together to uphold the highest standards of scientific publishing.

Peer review remains one of the most essential expressions of academic responsibility and collegiality. The continued growth, credibility, and international visibility of the journal depend directly on this shared commitment to excellence.

For this reason, the Editorial Board is particularly pleased to recognize the **Top 10 Outstanding Reviewers of 2025**. Selected on the basis of the number of completed reviews, timeliness, and the depth and constructiveness of their reports between January 1 and December 31, 2025, these colleagues have made an exceptional contribution to improving the quality of manuscripts and strengthening the journal as a whole.

To all our reviewers, we extend our sincere appreciation. We look forward to continuing this collaborative work in advancing the quality, integrity, and impact of Annals of Geophysics in the years ahead.

Top 10 Reviewers of 2025

- **Ana Astort** - Istituto Nazionale di Geofisica e Vulcanologia (Italy)
- **Peter Betts** - Monash University, Melbourne (Australia)
- **Jacopo Boaga** - Padua University, Padova (Italy)
- **Andrea Caruso** - Alma Mater Studiorum, Bologna University (Italy)
- **Francesca R. Cinti** - Istituto Nazionale di Geofisica e Vulcanologia (Italy)
- **Domenico Di Mauro** - Istituto Nazionale di Geofisica e Vulcanologia (Italy)
- **Haipeng Li** - Department of Geophysics Stanford, CA (US)
- **Liliana Oliveira** - Instituto Dom Luiz, Lisboa (Portugal)
- **Juan David Solano-Acosta** - Tallinn University of Technology, Tallinn (Estonia)
- **Davide Zaccagnino** - Risks-X and SUSTech, Guangdong (China)
